How to set up your Phonate roaming service?

- 1 Open a Phonate Roaming account and we will give you a free** Phonate telephone number, e.g 020 7123 4567.
- 2 This is the Telephone number people can call you on to get in touch with you, whenever you travel to any country in the world.
- 3 Purchase a local sim when you reach the country you are visiting, then update your Phonate account with your new number that you will receive with your sim.

You will then receive all your calls to your new local sim.

You will not miss a single call if you are unavailable (while flying or in meetings or a period of time when you do not want to be disturbed.) we will take your messages and e-mail your voice messages as attachments.

How you will save 95% on roaming charges?

Example: Mr. Adams would like to take his Mobile*** phone with him on his travels to India, as many of us would usually want to do. Unfortunately for Mr. Adams he will be charged around **£1.50** per minute to receive his calls whilst in India. On the other hand if Mr. Adams had a Phonate roaming service account set up he would only be paying **2p** a minute to receive his calls, a substantial saving as against the standard charging.

Do not delay open a Phonate account today and start saving.

Phonate Roaming - simplifying and reducing the cost of communications for you.
